Chicken Coop Size Chart

Standard hens - 4 sq ft of coop and 10 sq ft of run per bird

Pin this inside the coop door. Work out the space your flock needs before you build or buy - figures are per flock, measured on inside floor area.

Hens	Coop sq ft	Coop m²	Run sq ft	Run m²	Roost bar 1 ft / bird	Nest boxes 1 per 3-4 hens	Example floor size
4	**16**	1.5	**40**	3.7	4 ft	1-2	4 x 4 ft
6	**24**	2.2	**60**	5.6	6 ft	2	4 x 6 ft
8	**32**	3.0	**80**	7.4	8 ft	2-3	4 x 8 ft
10	**40**	3.7	**100**	9.3	10 ft	3	5 x 8 ft
12	**48**	4.5	**120**	11.1	12 ft	3-4	6 x 8 ft

BANTAMS & OTHER BIRDS

Bantams need less room: 2-3 sq ft of coop and about 8 sq ft of run per bird, with the same 1 ft of roost and one nest box per 3-4 hens.

Large, heavy breeds go the other way - allow about 4.5 sq ft of coop and 12 sq ft of run per bird.

Measure the inside of the coop, not the outside of the box it came in. Floor taken up by feeders and drinkers does not count. More space always means a calmer, healthier flock - these are comfortable figures, not the tight minimums factory farms use.
